### **DETAILED ACTION**

# Allowable Subject Matter

Claims 17-34 are allowed.

The following is an examiner's statement of reasons for allowance:

A motion sensor for measuring animate activity comprising a non-deformable fluid-tight housing containing anisotropic molecules and electrodes in communication with the molecules to detect their state based on co-movement of the housing and the anisotropic molecules and outputting a signal representing an activity level of the animate subject as claimed is not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Frank (US 2001/0048313) discloses a motion sensor that incorporates a moving liquid and detecting a change in capacitance. There lacks a teaching suggestion and it does not appear obvious to incorporate anisotropic molecules within the liquid.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Manuel whose telephone number is (571) 272-4952.
